**Subject:** RE: Pedestrian Crossing at the River Road

Cllr Fitzpatrick,

A signalised pedestrian crossing (traffic lights) is planned for this location and all works to date are 'future proofed' to allow for the installation to take place without any abortive works.

The situation is that the planning department are in a dispute with the developer in relation to their planning obligations. The pedestrian crossing forms part of these planning obligations. It is hoped that this will be settled in the next couple of months but until this is settled no further work can be carried out at this location.

Unfortunately there is nothing further that the traffic department can do at this time, however as I said above, it will hopefully be resolved in the coming months.

Kind regards,

**Subject:** FW: Pedestrian Crossing at the River Road

Eoin,

Can you please advise if DCC has any plans to put in place a pedestrian crossing on the River Road at the spot in the photo below ? It is a designated pedestrian crossing point at which pedestrians cross from Tolka Valley Park to Royal Canal on a regular but increasingly dangerous basis?

With thanks,  
Mary
